a · light

New from a-light, Relay

Relay is a direct/indirect pendant system with 90° and 120° angles, enabling designers to configure diverse geometric patterns with a seamlessly lit shape. Relay luminaires are designed for high ceilings such as offices, libraries, high-end retail or food markets, and upscale gyms and recreational facilities such as yoga studios.

- 6 different choices of shapes and customizable sizes from 3'-17' for an exact fit
- 30 different colors available for the acoustical option
- Tunable White and Warm Dim technology available
- Embedded controls available

LUMINIS®

INLINE by Luminis

Inline is a discreet, sophisticated luminaire with outstanding performance and functionality.

Inline's light modules rotate 355 degrees individually for controlled illumination and one-of-a-kind lighting flexibility. This unique feature allows for precise directional aiming of the light beam without disturbing the position of the luminaire.

- Available as a bollard or pole
- 7 different height options
- 20 different finishes, including faux wood
- True Amber LED Available
- nLight air capable
